

DEOPP

The Decentralized Empowerment
of Prospering People

WHAT IS DEOPP

DEOPP IS...THE DECENTRALIZED EMPOWERMENT OF PROSPERING PEOPLE = DEOPP

What DEOPP is...and What DEOPP is not...

How it was designed...and developed to function immutably...

AND...How it can work to assist anyone who chooses to participate in DEOPP to earn passively...and please note many things are repeated on purpose.

THE DEOPP SMART CONTRACT...

All who choose to participate in DEOPP as a Prospering Member can start with a minimum of 100 Tron TRX.

The DEOPP Smart Contract includes a "Growth Rewards" plan (some may refer to it as referral commissions) DEOPPs are called "Growth Rewards".

The Growth Rewards are supported through every Prospering Participant Members...(also may be referred to as community members) deposit...which are called "power contributions".

This preprogrammed automated function of power contributions works to eliminate stress to the DEOPP Smart Contract balance...in that...the automated revenue created through the power contributions organically works to self fund the Growth Rewards that each Prospering Member can receive...if they choose to share The DEOPP Smart Contract.

THE GROWTH REWARDS ARE AVAILABLE TO EACH MEMBER WHO CHOOSES TO SHARE AS FOLLOWS...

Every Deposit coming into the DEOPP Smart Contract will generate a 10% Power Contribution into the DEOPP Smart Contract balance.

This 10% is considered a Power Contribution...as each Prospering Member must "agree" to before joining DEOPP...by the initial act of depositing a minimum of 100 Tron TRX. This is done through their Prospering Member sponsors link...they are agreeing to their own support of the Power Contributions by making their initial deposit of at least 100 Tron TRX...as laid out in the following Agreement.

PARTICIPATING PROSPERING MEMBER AGREEMENT...

By making my first initial deposit of at least 100 Tron TRX...I acknowledge that DEOPP is a uniquely designed...revenue generating smart contract.

Therefore...I acknowledge that every deposit that I make into the DEOPP Smart Contract will automatically deduct 10% of my deposit. This 10% is considered a Power Contribution...that I...as a Prospering Participant...Community Member understand is my contribution for the use of the DEOPP Eco System as a Prospering Member...and I understand that my contribution is supporting the growth of The DEOPP Smart Contract Community...further...I understand that the 10% Power Contribution creates a built in...automated revenue source...which can help to sustain the growth...and longevity of The DEOPP Smart Contract balance. Thus...Growth Rewards are then organically funded through 8% of the 10% Power Contributions...with 2% of the 10%...going into the DEOPP Smart Contract balance as an organic automated source of revenue to help sustain the DEOPP Smart Contract Balance...therefore the DEOPP smart contract balance doesn't solely depend upon community deposits...but functions similar to the banking system...which as we know for many years has figured out a way to leverage the funds of its depositors...and customers to create additional revenue resources to help them to not only operate successfully but to profit substantially...and sustainably.

The Growth Rewards are automatically paid out directly to each sponsoring members Tron TRX connected wallet...who decides to share The DEOPP Smart Contract through their "Share Link" as follows...

GROWTH REWARDS PAY OUT DOWN TO 10 LEVELS DEEP...

LEVEL 10

0.1%

The total equals 8% of the 10%.... the remaining 2% of the 10% is going directly into the DEOPP Smart Contract as organic revenue to help sustain the DEOPP Smart Contract balance.

FURTHER PARAMETERS OF THE DEOPP SMART CONTRACT...

Every "Prospering Participant Member" who may also be considered a Community Member...can earn 3% every 24 hours from the time of each deposit into their DEOPP Smart Contract individual Deposited amount...which would be 90% of their actual deposit...since 10% of every deposit is an automated Power Contribution...as explained in detail above.

DEOPP is designed so that the individual deposited amount will always be 90% of the actual total Tron TRX deposit...since 10% of every deposit...is considered a Power Contribution...which goes directly into the DEOPP Smart Contract balance as revenue to have 8% supporting the Growth Rewards...and 2% as revenue to support the DEOPP Smart Contract balance...thus...the design of DEOPP was created to be a truly sustainable eco system. (Yes this is intentionally being repeated)

WITHDRAWS...

There are 4 Tabs in place for the withdraw section...with a thorough description of what each tab stands for...DEOPP is professionally unique in that each tab initiates the action as described automatically.

Tab 1 50/50

By selecting Tab 1...I agree to an automated power contribution of 2% of my withdrawable amount of 205

Tron TRX or more...to go to directly support the DEOPP smart contract as revenue into the smart contract balance...further I agree that I desire to have the remaining amount to be divided in half...with 50% going directly into my Tron TRX connected wallet...and the remaining 50% to be redeposited into my DEOPP Smart Contract total deposited amount to work to increase to compound the daily earnings that I receive...by increasing the amount available to receive earnings from...and I also agree to making an automated power contribution of 8% of this redeposited amount to work to support the eco system as designed to help sustain the DEOPP passive earnings smart contract balance. By choosing Tab 1...I will also save in gas fees...by automatically redepositing...and not having to do so directly from my Tron TRX connected wallet. You will note the redeposited amount on your dashboard.

Tab 1 will highlight to utilize once your withdrawable balance has reached 205 Tron TRX or more.

Tab 2

Withdraw and Redeposit 100%

By Selecting Tab 2...I agree to an automated power contribution of 2% of my withdrawable amount of 103 Tron TRX or more...to go to directly support the DEOPP smart contract as revenue into the smart contract balance...further I agree that I desire that the remaining amount to be redeposited into my DEOPP Smart Contract total deposited amount to work to increase to compound the daily earnings that I receive...by increasing the amount available to receive earnings from...and I also agree to making a power contribution of 8% of this amount to work to support the eco system as designed to help sustain the DEOPP passive earning smart contract balance. By choosing Tab 2 I will also save in gas fees...by automatically redepositing...and not having to do so directly from my Tron TRX connected wallet. You will note the redeposited amount on your dashboard.

Tab 2 will highlight to utilize once your withdrawable balance has reached 103 Tron TRX or more.

Tab 3

Withdraw all available 60 day intervals

By selecting Tab 3...I agree to an automated power contribution of 2% of my withdrawable amount...to go to directly support the DEOPP smart contract as revenue into the smart contract balance...and I desire that the remaining amount will be automatically deposited into my Tron TRX connected wallet. Please note...Tab 3 is available after 60 days from an individual Prosperity Participants initial starting deposit...and will be available once every 60 days for the life of the DEOPP Smart Contract...thus working to further sustain the functionality of DEOPP.

Tab 3 will not highlight for use until after 60 days from your initial deposit or after 60 days from your last use of Tab 3.

Tab 4

Early withdraw of available withdraw amount

By selecting Tab 4...I understand that selecting Tab 4 under the parameters of the DEOPP Smart Contract...results in the following necessary withdraw structure...this Tab may be selected if needed as an early withdraw option of the withdrawable amount...and I agree to an automated power contribution of 2% of my withdrawable amount...to go to directly support the DEOPP smart contract as revenue in the smart contract balance...and I also agree that an additional 20% will automatically be withdrawn from the remaining withdrawable amount as an early withdraw power contribution into the DEOPP Smart Contract Balance to continue to help sustain and support the balance of the DEOPP Smart Contract Community Eco System. The remaining withdrawable amount will be deposited into my TRON TRX connected wallet automatically. Therefore...please note that Tab 4 should only be selected if necessary at the Prosperity Participants own choosing.

Tab 4 will always be highlighted for use for early withdraws not reaching 103 Tron TRX yet...or for those needing to withdraw without making an automated redeposit.

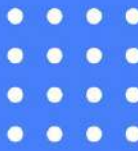

NOTE...TABS 1 THROUGH 4 ARE IRREVERSIBLE...

As once selected the Smart Contract takes immutable action through the Blockchain to process your selected Tab choice request.

In reading the parameters of Tabs 1 through 4...you'll note that every deposit...and withdraw action taken within the DEOPP eco system creates an immutable automated Power Contribution into the DEOPP smart contract balance...thus DEOPP always gets fed before we do. This action helps to create sustainable growth...as DEOPP is the very eco system that is functioning to help make possible our passive earnings...and therefore DEOPP will always get the sustainable...automated organic revenue support as designed into the smart contract before any Tron TRX goes in or out to any Prospering Member Participate.

FURTHER FEATURES OF DEOPP...

DEOPP works to help each Prospering Participate Member to stay organized...

The DEOPP smart contract works to track...and display for all Prospering Members to see the number that each tab has been used...and the percentage of such.

The DEOPP smart contract has a tab available for everyone to see the balance...and the smart contract coding.

The third party audit report is available for everyone to see for credibility and security.

All individual deposits are active until they have paid out 300% in total rewards...and do note that the initial deposit is included in that total payout.

The maximum contribution per Prospering Member is 3,500,000.00 Tron TRX

The minimum contribution per deposited amount is 100 Tron TRX.

The Total contributed amount of all Prosperity Participants collectively is displayed.

The total number of Active Prosperity Participant Members is displayed.

DEOPP...

A Decentralized Opportunity...
Created with a passionate purpose to...

Decentralize Empowerment of Prospering People...by contributing and becoming a Prospering Participant Member...
You agree to become a positive Community Member of a like minded community...By Supporting...a Revenue
Generating Sustainable Eco System that was designed to assist those with a positive freedom thinking mindset to
participate in a truly automated passive earnings Smart Contract.

The DEOPP Smart Contract has its own preprogrammed...immutable revenue generating eco system...
as well as support from a positive community who has chosen to empower themselves to prosper...by participating
in their own decentralized community supported banking system...that pays them the rewards...similar to the way
that banks have been paying themselves for years.

Here's the thing...Every bank...business...and income stream on the planet...requires people to succeed...DEOPP needs
people as community support as well...however...It was designed to work similar to the banking system...and thus DEOPP
has created its own preprogrammed...immutable...
organically grown revenue resource...which has been built into the functionality of the DEOPP Smart Contract to work to
help to sustain itself.

We as participating Community Members...also known as Prospering Member Participants are taking our power back by using our own funds as leverage...instead of handing them off to let the banks have all the fun...and gain all the profit.

The successful transaction of money coming out...requires money going in through more ways than one...and that is a proven fact.

If an eco system is to be sustainable it must have a revenue resource that supports its growth...DEOPP has that built in!

Thank you for considering DEOPP as your passive earning eco system...if you "get it"...if you see what has been created for you through The DEOPP smart contract...then we as a Supportive Positive Community...Invite you to join us through the "share link" of the Prospering Participant Member who invited you to take a look at our unique...and professionally created...DEOPP passive earnings Eco system.

Please note that everything is a risk...there are no guarantees...and it's a persons own individual freedom that offers you the choice to choose to participate in DEOPP...and become a Prospering Member Participant or not. In choosing...we ask that you become a positive...supportive...responsible Community Member or not one at all. DEOPP was created out of a passion to eliminate nonsense...and the get rich quick...lazy...won't take the time to read for themselves...mentalities.

Every individual joining must be 18 years old or older...and thus an adult...so please be a responsible adult...and do not join if you haven't taken the time to read...to understand what it is you're joining.

DEOPP is an automated...passive earnings Eco system...so if you need constant guidance...other than what's been given here...then please do not join.

DEOPP is not a company...it's a Decentralized eco system designed into an immutable smart contract that has been deployed on The Blockchain...it's for self starters...and freedom thinking...positive adults...who know how to function as such...and yes "get it"...meaning you get exactly what DEOPP is...and what DEOPP is not.

Thank you to all who took the necessary time to do the professional...responsible thing...and read the DEOPP white paper outline as you are reading it now before getting started.

AND...we hope you always choose to have the best day possible!

The DEOPP Community

*Thank
you!*
